

“A Conversation with Greenable Woodbridge” - Using Water Wisely Starts With YOU!

## Using Water Wisely Starts With YOU!

Saving water helps everyone and ensures this precious resource is available for future generations. The link below provides helpful hints on ways you can save water in and around your home and business. <http://www.middlesexwater.com/customer-care/water-conservation-tips>

Water is a finite resource and the supplies on Earth today are no more than what was here at the beginning of the planet. That's why by making small changes, you can make conserving water a daily part of life. The U.S. Environmental Protection Agency realized that managing water supplies was becoming an increasingly important issue around the country so it created the

Water Sense Program. Through this national program, local water utilities, product manufacturers, and retailers work with EPA to encourage the use of water-efficient products and practices among consumer and commercial audiences. You can save water and protect the environment by choosing WaterSense labeled products in your home, yard, and business. Middlesex Water is proud to be a WaterSense partner and encourages you to check out <http://www3.epa.gov/watersense/>
